

Conley Terminal awarded \$20M USDOT 2019 BUILD Grant

Markey, Warren, Lynch, and Pressley Announce \$20 Million Grant for Massachusetts Port Authority

Thursday, November 7, 2019

Washington (November 7, 2019) – Massachusetts Senators Edward J. Markey and Elizabeth Warren, and Representatives Stephen Lynch (MA-08) and Ayanna Pressley (MA-07) today announced that the U.S. Department of Transportation (DOT) has awarded a \$20 million "Better Utilizing Investments to Leverage Development (BUILD)" grant to the Massachusetts Port Authority (Massport). This federal funding will help Massport expand its volume capacity by 100,000 containers at the Conley Container Terminal, as well as construct a new Cypher-E freight corridor in South Boston.

Investments in waterside and landside infrastructure help keep Conley Terminal competitive with other ports along the east coast. Boston Harbor is currently being dredged to accommodate the large container vessels calling today and into the future. The project is a \$350 million partnership between the U.S. Army Corps of Engineers, the Commonwealth of Massachusetts, and Massport. Conley Terminal also has other improvement projects ongoing, including the purchase of three new ship-to-shore cranes, construction of two 50-foot berths, expanded reefer storage, and new in-and-out gate facilities. Massport is ensuring that Conley Terminal is big ship ready in order to welcome even larger ships to the New England market.

The Boston Globe Conley Container Terminal in South Boston receives \$20 million in federal money for face lift

Conley Terminal USDOT 2019 BUILD Grant – Projects

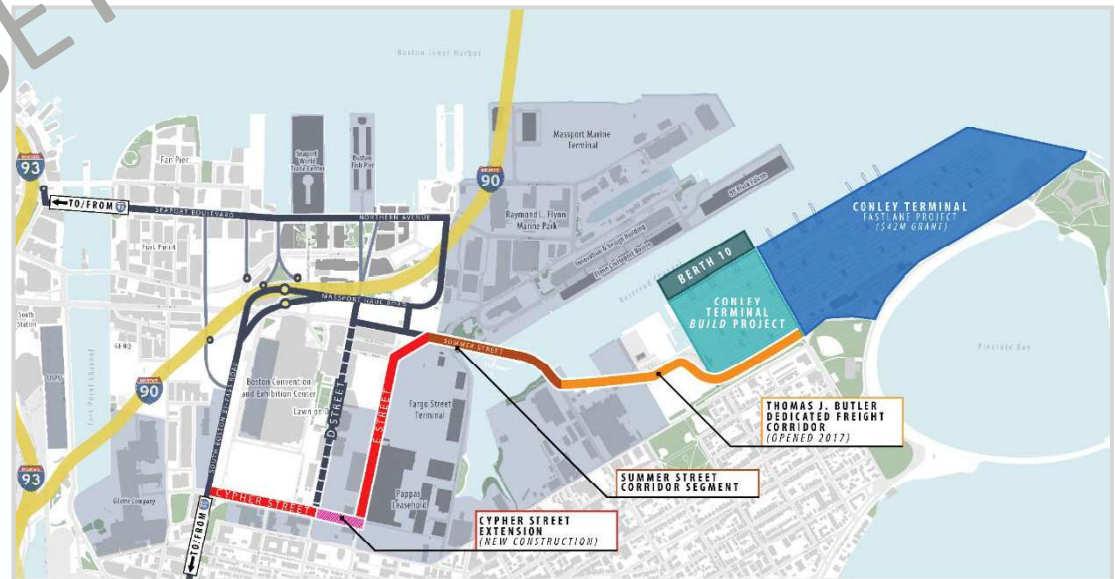

The BUILD grant project includes three major components:

1. Expansion of container storage capacity at Conley by nearly 30%
2. Construction of the Cypher-E Truck Route
3. An innovative gate and logistics system at Conley to improve safety, truck wait times and the efficient movement of trucks to and within the terminal
